

## Press release

### **Digital360: P4I launches GRC<sub>360</sub>, integrated solution – consulting and IT platform – for the comprehensive management of personal data protection obligations**

Milan, 5 June 2019 – **Digital360 S.p.A.**, a company listed on the AIM Italia - Mercato Alternativo del Capitale market, organised and managed by Borsa Italiana S.p.A. (“AIM Italia”), through its subsidiary **P4I-Partners4Innovation**, has launched on the market **GRC<sub>360</sub>**, a comprehensive solution to manage the obligations provided for by current legislation on the protection of personal data (GDPR). The new solution enhances the Company’s As-A-Service Advisory offer provided to organisations engaged in the digital transformation process.

The solution, based on the GRC software platform (Governance, Risk and Compliance) developed by Keisdata, integrates the methodology developed by P4I-Partners4Innovation within the scope of a large number of projects aimed at ensuring compliance with the GDPR. “Thanks to GRC<sub>360</sub> – explains **Gabriele Faggioli**, CEO of P4I-Partners4Innovation – we offer the market a unique solution, which integrates our consultancy services (legal, organisational, cyber-security, audit) on one side, and the DPO (Data Protection Officer) As-A-Service solution on the other, with a complete and flexible software platform that facilitates the comprehensive management of obligations provided for by current legislation on the protection of personal data”.

In particular, the solution allows organisations to maintain their Register of data processing operations, to carry out risk analysis and mitigation, to execute impact assessments, to appoint data processors, to manage requests from Data Subjects and to handle data breaches. Moreover, it makes it possible to schedule and carry out audits and training campaigns, to assign and monitor the progress of planned actions and to have a summary view of the Group’s or of the specific Company’s compliance level, thanks to a customisable dashboard with views on specific areas where deficiencies exist. The offer is modular, both in terms of the functions available and the number of users, as well as the possibility of customisation and integration with other systems.

GRC<sub>360</sub> is suitable for all types of organisations, regardless of their size (SMEs or large companies), corporate structure (companies or groups), business sector (private or public) and territorial reach (Italian or international).

The module dedicated to the protection of personal data is the first of a series of modules that will be developed with a focus on the management of compliance, as a whole, with the aim of offering the market a unique solution capable of supporting companies and Public Administrations in the application of all regulations, management systems and standards in force.

“We are in fact convinced – Gabriele Faggioli affirms – that the integrated offer of highly professional consultancy services and related software platforms allows us to effectively and efficiently respond to the needs of organisations, even those smaller in size, to manage all obligations and processes relating to the increasingly large number of compliance regulations”.

#### **The Digital360 Group**
